- \* 100% All PEG fill

### **HOTSPOT®**

- \* Recreation grade
- \* Blended shell
- \* Consistent size and shape for quality shells
- \* 100% All PEG fill

### **History of Nelson Paint Company**

Evan and Charles Nelson not only co-founded The Nelson Paint Company, they also invented the paintball! The Nelson Paint Company started in 1940, originally serving the forestry market by producing premium tree-marking paints. In response to the challenge foresters faced with marking trees in hard to reach places, the brothers invented a paint pellet that could be shot out of a gun. The original pellet had an oil-base paint fill, in order to leave a long-lasting mark on the tree. Foresters used the pellets to mark trees, ranchers used the pellets to mark livestock, and eventually people marked each other with it. As pellet marking became a more regularly played game, Charlie Nelson created a washable paint pellet that allowed for easier cleanup. Paintballs have since taken on a life of their own and the sport of paintball is now played internationally.

Nelson Paint Company produces paintballs in various calibers including, but not limited to, 6mm, .40, .43, .50, .62 and .68 caliber. Nelson still manufactures the original oil-based paint pellet used in forestry and animal marking, and also now offers a line of ScentBurst® products used as an animal attractant for hunting and a line of deterrent scents for nuisance animals. Nelson Paint Company has also developed the Deter-it® Less Lethal line of projectiles used to compel deterrence of undesired behavior in humans and animals; these projectiles can be used on a suspect or in deterring animals at a fraction of the cost of other available less lethal projectiles on the market.

Nelson Paint Company specializes in custom encapsulation in many sizes and products including, but not limited to, industrial chemicals, herbicides, lubricants, adhesives and scents. Nelson is always open to custom encapsulation and welcome people to contact us about their encapsulation project.

The Nelson Paint Company takes great pride in the fact that we invented the paintball and forest-specific paints. We continue to produce some of the highest quality paints on the market and through our dedication to research and development will continue to manufacture innovative paint products.

**We were the first, we are still the best and OUR paintballs are  
MADE IN AMERICA!**
